After going virtual in 2020, Science Fest returned to campus this year on Saturday, October 9! This annual event provides fun-filled, educational experiences for kids of all ages and draws hundreds of families to IU Bloomington.

Our department shared the excitement of math by hosting 3 activity stations:

- Build Complex Geometric Shapes
- Logic Games
- Topological Puzzles

The area behind Rawles Hall, renamed the “Puzzle Patch” for the event, was filled with curious, enthusiastic participants. “Our station featured the magic paper clip trick popularized by Martin Gardner. I think most of the kids found it a bit mind-bending, but in a good way,” said Daniel Condon, a graduate student volunteer. Professor Mihai Ciucu led our team of volunteers.

This was graduate student Somi Kang’s second year volunteering at Science Fest. She noted that the event is “a good chance to learn how to teach about math to young children and give them motivation.” Although, she added with a laugh, “Some of the parents were more interested than the kids!” Both Somi and Daniel agreed it was nice to see so many people participating in-person again.
